

Cash Loss Prevention System

FRONT LINE TILL SKIMMING RETAIL SOLUTION

- Reduces shrinkage risks and cash snatches at checkout enabling instant deposit right after cash collection from the customer
- Guarantees Safe Withdrawal of cash from the front line to the back office through use of auto-sealing, tamper evident, plastic bags with stacked notes

SECURE CASH STORAGE AT THE FRONT LINE

Retailers can obtain significant benefits from the multiple features provided by the innovative CashSecure *CS1one*.

With *CS1one*, both validation and deposit are available directly at the POS using a unique cash deposit system. Due to its small footprint it can be easily placed below or beside the cash till with minimal impact on existing workstations.

The flexibility of this device guarantees easy integration with devices already present at the cash point - PC, printer, badge reader - to take advantage of the full potential of the existing workstation.

FLEXIBILITY

While the *CS1one* fits seamlessly under/on any standard counter, fastened through its bracket systems, the *CS1oneT* is designed for environments that requires higher security levels since the device is firmly blocked on the floor and equipped with a mechanical lock.

Maintaining same reduced footprint and features, the *CS1oneT* can be easily managed in standing retail checkouts extending workstation configurations.

CS1one T

CS1one

Smart Integration

The CS1one compact design and footprint accommodate any modern retail environment, performing counting and depositing of banknotes at checkout in a very simple and straight way.

INCREASE EFFICIENCY

Creating a closed cash handling process at the front line – counting, validating and secure storing – CS1one allows cash to be processed very quickly, less expensively and more securely.

IMPROVE LOGISTICS

CS1one reduces general costs introducing automatic solutions for cash handling and transportation. The CTS exclusive auto-sealing, tamper evident, stacked bag combines together the benefits of both cassette and plastic bag. As result, cash withdrawals are easier and faster while guaranteeing high levels of security during the transportation process.

SPECIFICATIONS
