

Laurel LAC-17 Coin Wrapping Machine

Description

The Laurel LAC-17 is a heavy duty coin wrapping machine used for the continual production of coin rolls.

Automatic Jam Reconciliation & Rejection

The Laurel LAC-17's unique mechanism clears jams quickly and automatically and the machine continues without interruption. Full coin sensors enable foreign coins, odd coins and smaller or larger diameter coins to be rejected.

Irregular coin stacks are automatically rejected into a 'Clear/Sort Box' with the number of coins rejected, automatically deducted and shown on the count display.

Multi-Coin Processing Capabilities (Self-Teach Mode)

The stacker motors and memory card make it simple to change coin wrapping specifications for whenever a new coin enters circulation or if other non-standard coins need to be temporarily handled.

**THIS MACHINE IS COMPATIBLE
WITH ORFIX AUTOMATIC COIN
ROLLS**

BASIC SPECIFICATION

Model		LAC-17	LAC-17ID
Dimensions	Height	450mm	
	Width	630mm	
	Depth	1085mm	
Material Detection Sensor		X	O
Weight		Approx. 150 kg	
Acceptable Coin Diameter Range		15mm ~ 33mm	
Acceptable Coin Thickness Range		1.0 ~ 3.5mm	
Wrapping Speed		Max. 40 rolls / minute	
Counting Speed		Max. 3000 coins / minute	
Acceptable Coin/Token Specifications		Max. 64	
Hopper Capacity		Approx. 18,000 coins	
Power Source		100 - 240V	
Frequency		50 - 60Hz	
Option		Hopper Sensor LAN Connection Simple I/F Count Chute Roll Printer (Factory Option)	

Unit 19, Turvey Business Centre, Turvey, Co. Dublin
