## LAUREL J-757 Basic Banknote Counter

This machine is a piece counter only and does not support currency recognition or value counting. It can therefore be used to count any currency.

### Description

Professional single denomination desktop banknote counter with UV and Size authentication.

### Technology

The J-757 is equipped with UV and size authentication sensors and an enhanced Counting Sensor System which significantly reduces the error and jamming rate when counting poor quality banknotes.

### Specifications

- Adjustable counting speed: 1000, 1250, 1500 notes/min
- Currencies: All
- Dimensions: 282 x 233 x 190 mm
- Hopper capacity: 500 notes
- Stacker capacity: 250 notes
- UV & Size Authentication
- Weight: 7kg
- Optional Extras: 3 Digit Remote Customer Display
- Interface: RS232 Output

#### What is Color Universal Design?

There is variation in the way individuals perceive colors, and many people find it difficult to see certain hues. Therefore, color universal design seeks to ensure that information is properly conveyed to all people regardless of their color perception. ([www.cudo.jp](http://www.cudo.jp)) LAUREL has employed this concept when designing the colors of indicator lights and the colors and shapes of operation buttons. The J-717 has received the color universal design certification mark from the non-profit Color Universal Design Organization.
